

Timber Flooring Grade Descriptions

Select Grade:

- The features that are present are relatively small and few in number. Irrespective of the species the features although visible do not dominate the appearance of the floor.

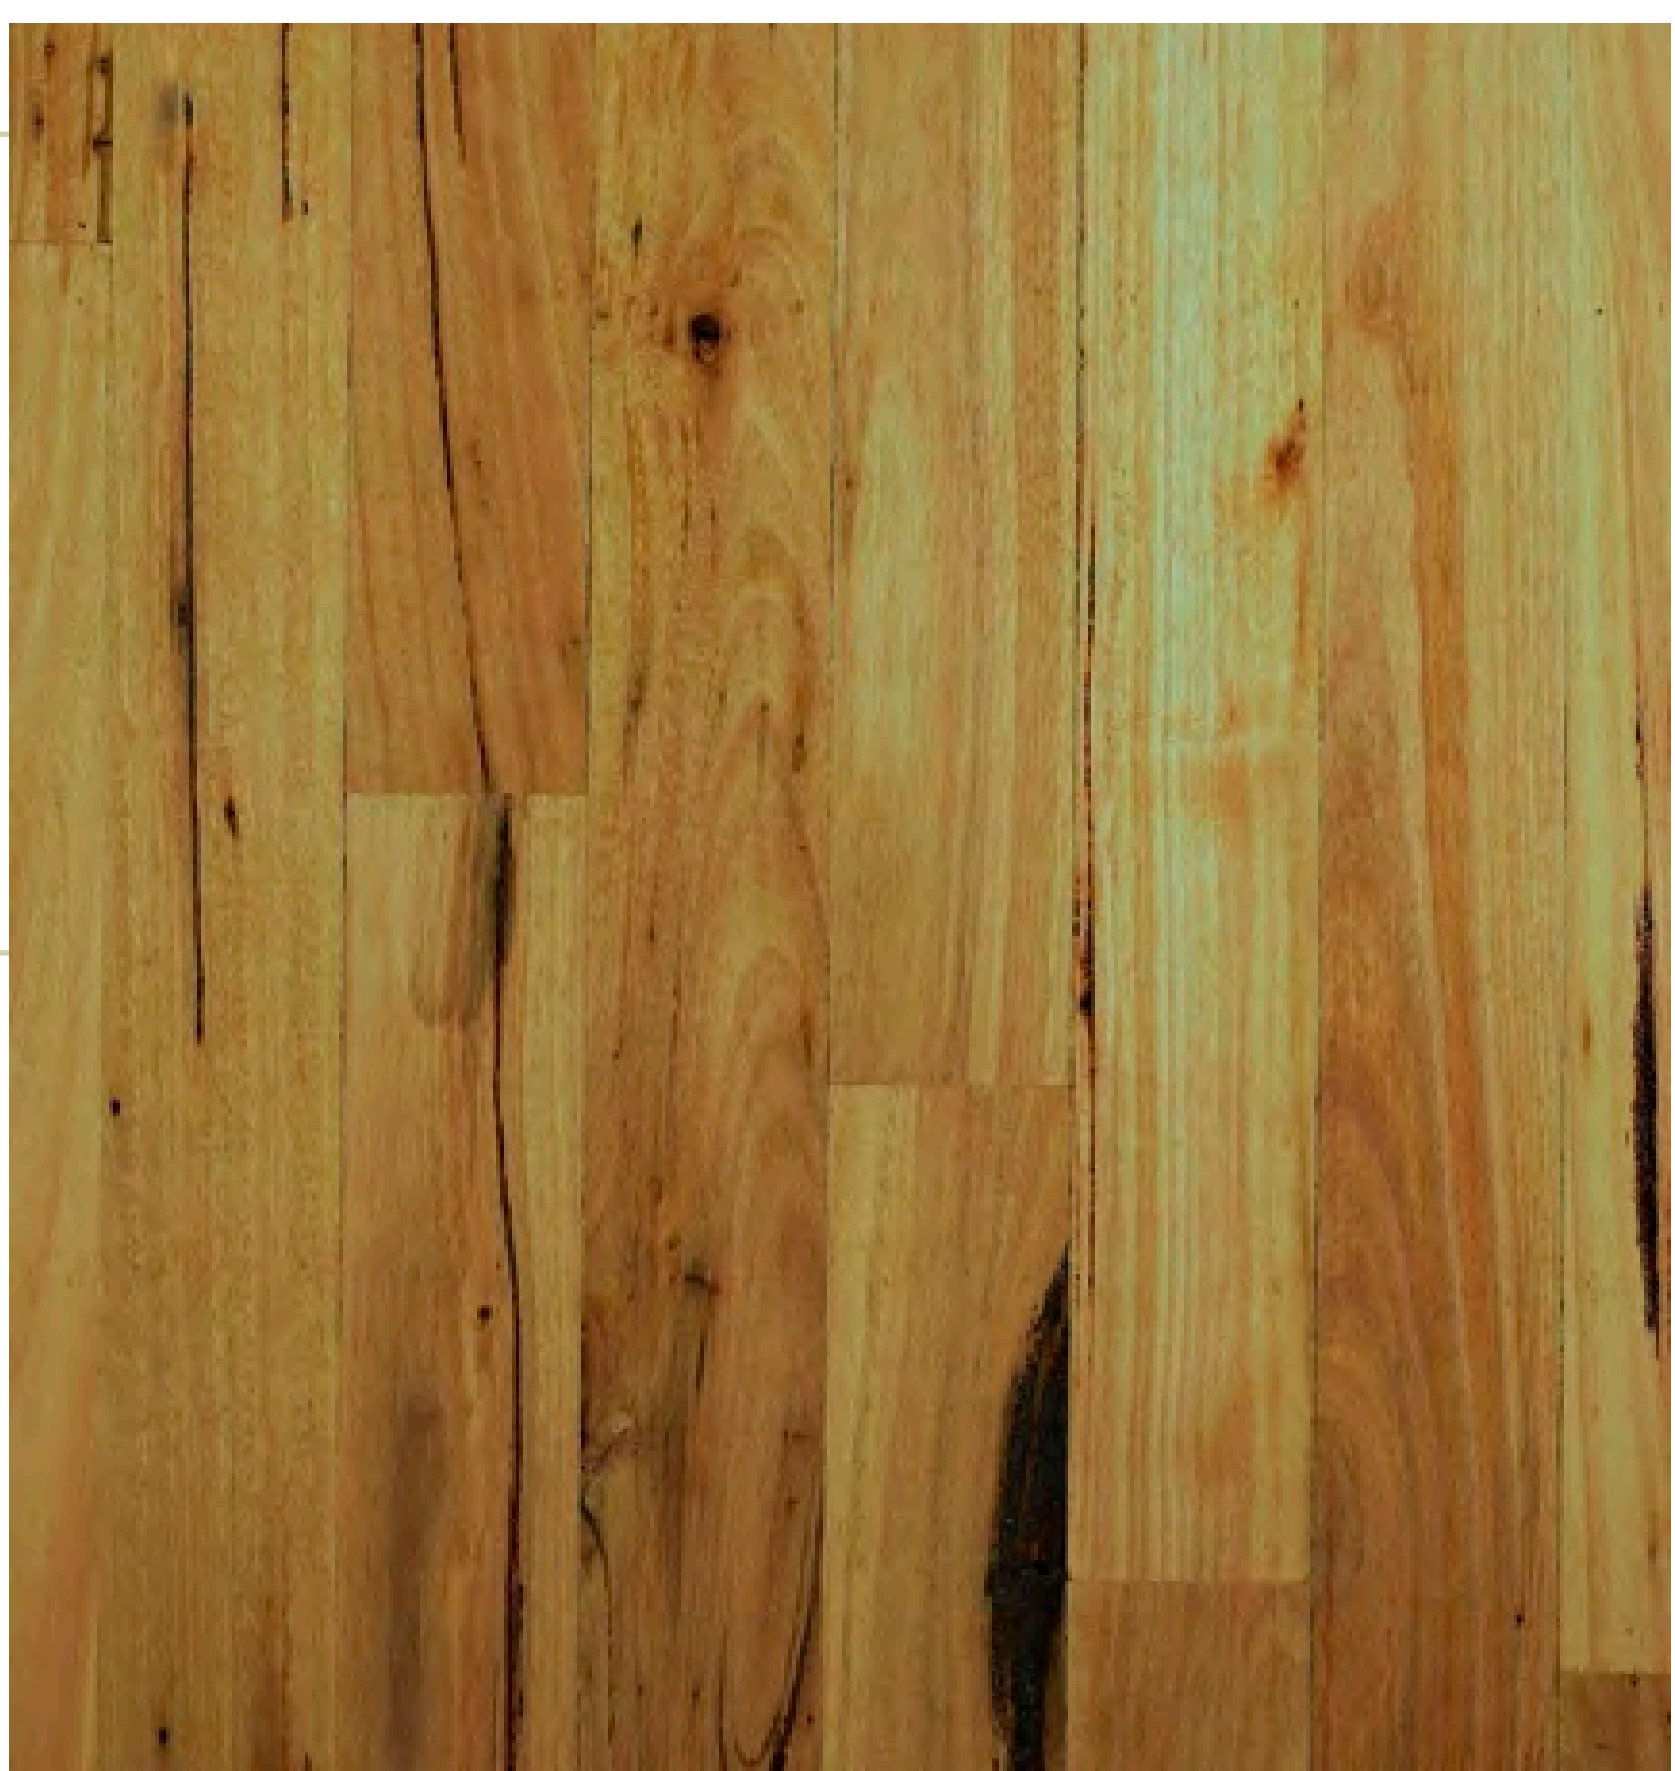

Standard Grade:

- This grade contains boards that may be moderately featured, including gum veins, insect trails, checking, pin holes and other types of interesting and natural characteristics.

Feature Grade:

- In many respects this grade can look similar to Standard Grade but with the features more frequent and dominant.

Standard & Better Grade:

- Combines the features of Select and Standard grade to provide a floor with slightly more character than a Select Grade floor. (*Also known as Prestige Grade*)

Feature & Better Grade:

- Combines Feature, Standard & Select grades to provide a floor with a rustic old world charm.
