

FLOORING WA SPECIES

Parkside flooring is an end matched, tongue and groove flooring which has been used by generations to complete their most beloved possessions.

KEY BENEFITS

- Our products are grown, produced and manufactured in Australia for Australian conditions.
- Timber floors are a natural resource and create five times less carbon emissions than ceramic tiles.
- Our WA flooring includes a stunning range of tongue and groove solid timber flooring and 13mm solid overlay.
- Parkside flooring is easy to care for once installed and sealed. Maintenance is low with just routine sweeping.
- Quality flooring by Parkside is excellent for hay fever and asthmatic sufferers as they are not conducive to dust mites and other allergen.

EASY INSTALLATION

Once laid, our flooring allows for traffic immediately, allowing other trades to apply their touches before sanding and final application of the desired finish.

Our tongue and groove boards widths up to 80mm can be secret nailed. Boards 130mm are required to be top nailed as per Australian Standard.

Timber flooring can be a do-it-yourself job as long as you understand your environment and correct installation practices. See Timber Queensland Technical Data Sheet No.17 and No.18.

Please see Parkside Flooring Overlay Installation Guide for requirements for overlay flooring.

SPECIES

Karri
Hardness 9.0

Jarrah
Hardness 8.5

Hardness refers to the Janka rating which is the hardness level given to each species. The higher the number, the greater the hardness.

GRADES

Select | Standard | Feature

SIZES AND LENGTHS

80 | 130 x 19mm (End Matched)
